Prevention

Supports posture during work activities that can be done in sitting position

Mobility

No limitations of mobility at workplace

Individual Settings

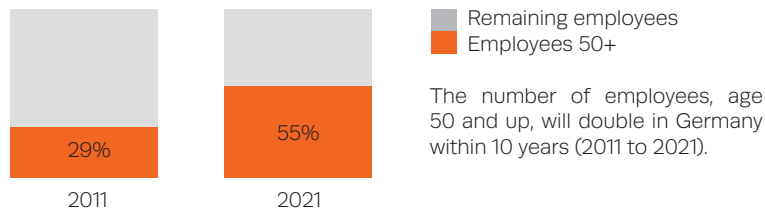

Adapts to the individual's body height and size

Increases productivity
Decreases physical strains
The Chairless Chair®

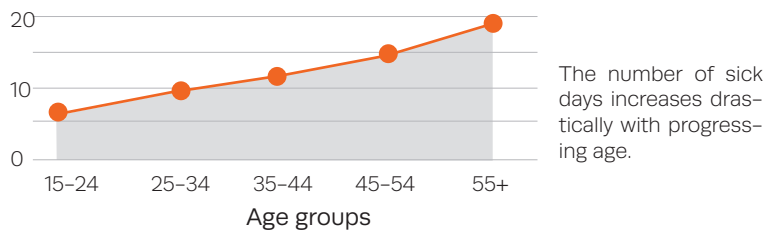

1 Since people aren't getting any younger, they need to become smarter

One thing is for sure, demographics are changing. Employees are getting older, which puts them at a higher risk of suffering from backpain. Diseases of the muscle tissue and the skeleton are already responsible for one fourth of all sick days. This creates enormous costs, and therefore, we need a clever solution – and we don't need this solution someday, we need it today!.

Age distribution among employees

Sick days / Year

2 More productivity, less physical strains – The Chairless Chair®

Creating an ergonomic, comfortable, and even more productive workplace without extensive changes at the workplace – thanks to the Chairless Chair®, this now is possible. All it takes to work in a healthy position is putting on our device, which only requires a few seconds. The Chairless Chair® allows you to effortlessly switch between an active sitting, standing, and walking position. This Innovation doesn't cost you money – it saves you money, since the use of the Chairless Chair® reduces the amount of sick days and decreases capacity constraints.

Without the Chairless Chair®:
A stressful, strenuous body posture.

With the Chairless Chair®:
A comfortable, relaxed body posture.

3 Back up your workers' backs: Learn more about the Chairless Chair®

By now, nearly all major car manufacturers, as well as other well-known* companies covering different sectors worldwide, use the Chairless Chair®. To ensure a smooth implementation of the product into your workplace, we follow our process developed a process (with the help of our partners in the industry) that leads to an ideal implementation. A face-to-face training on your premises, or at our academy, makes up an important part of this process. By doing this, we ensure the ideal use of the Chairless Chair®. To learn more, simply give us a call; there are no strings attached. We are also happy to provide you with information on different financing options, such as our renting or leasing models.

During the implementation of the Chairless Chair®: noonee specialists provide support.

The advantages of the Chairless Chair®

- Allows employees to work in a comfortable position
- Increases productivity

- An active sitting position promotes health by means of prevention
- Ensures jobs even with progressed age
- Flexible and easy to Use
- It takes less than 60 seconds to put the device on – and it takes even less time to take it off again
- Replaces disruptive chairs and auxiliary seats

Case Study: Scott's first experience with the Chairless Chair®.

Scott works as a mechanic. He enjoys his job, but at the end of the day he leaves work completely exhausted and suffering from back pain. Since Scott is not the only one at his workplace who has to deal with this problem, the factory manager decides to order a Chairless Chair® as part of a pilot project

Bianca from noonee introduces Scott and his colleagues to the Chairless Chair®: a lightweight, robust exoskeleton which one can flexibly carry around. As a result, stress on legs and back is relieved. Everybody receives a brief training during which Bianca adjusts the Chairless Chair's® settings so they match the individual body

height and shoes of each participant..

Scott is surprised to see how easily the Chairless Chair® glides can be attached to the body – it takes less than a minute for him to get ready for work. He also notices that the Chairless Chair® requires him to sit dynamically, which other than expected, isn't strenuous at all and helps protect his health. Scott now wants to get a sense of how it feels to work with the Chairless Chair® and is pleased to see that the Chairless Chair® allows him to work much more comfortably and that he is even more productive when using it. After a long day at work Scott goes home without feeling exhausted..

How much space does the Chairless Chair® require? None!
